Re: Pre-Construction Surveys
Orleans Marina Floodwall Replacement Project
LPV-101.02

To Whom it May Concern

This letter is to inform you that as a resident or property owner along Lake Marina Avenue, from Lakeshore Drive (Floodgate L-5) to the West Roadway Street area (Floodgate L-1), demolition work to the referenced existing floodwall and taller T-wall construction under the direction of the U. S. Army Corps of Engineers and Orleans Levee District (Local Cost-Share Partner) will begin in the next two months. This project is to improve the hurricane protection to a 100 year storm level.

The project is expected to take 18 to 24 months to complete. Prior to this work beginning, the firm of Oil Land Services, Inc. will begin pre-construction surveys for the facilities on both sides of Lake Marina Avenue. Your cooperation with their personnel would be greatly appreciated in their inspection of existing conditions within the construction project limits.

If you have any questions, please contact me at (504) 286-3100, x-1007. Oil Land Services, Inc. can be reached at (337) 233-4156 if you have any questions for them.

Sincerely

Gerard J. Gillen, III
Director of Hurricane and Flood Protection
