

August 1, 2017

Dear Residents,

It's great to see the light poles from CLECO have arrived, but what is even better is the fact that they are being installed. This is a plus for our neighborhood and for Moonraker Island Civic Organization which has been working to see this day for over two years. Thanks for your patience and your support.

Speaking of support.. your new secretary treasurer, Naomie Hess, has mailed out requests for member support to those residents who have not sent in their \$20 dues. Please forward your payment. It will certainly be appreciated.

MICO has been pressing the issue of the Moonraker/Clipper bridge which is worse than it was 3 years ago when we first pressed the parish to reconstruct it. Your president, Stephen Deep, has the information given to him by Jason Chambre, the chief engineer on this job. I have received word from Mike Noto, Assistant Director of Operations, [ST.TP](#). He stated, " This project is currently in contract creation and under review at our PROCUREMENT office.

It may take 30-45 days from today (July 31) to get a signed contract and a purchase order issued. As soon as we get a purchase order we will issue the Notice to Proceed to the contractor. At that time the contractor may start the work. The contract time for the project is 365 days." Stephen Deep will give you more info.

There were 2 sheriff's deputies patrolling our neighborhood today. Each one has parked his car to look out for speeding vehicles. TICKETS WILL BE ISSUED.

... Bonnie
