**Subject:** Re: Trying to get information

As far as the street goes, the entire street is going to be redone. I'm having a meeting Friday morning about the plan because I want to make sure that it's done correctly. The reason why Moonraker wasn't repaved on the same time line as Eden Isles is because the parish needed to do some drainage work on Moonraker first and redoing Moonraker is several times the costs of those streets because it is almost a mile long.

I'll check on the status of the other requests. I'm hoping to get a meeting set up with the Cleco rep to go out there for the lights.

Jake
