

Meeting of October 10, 2018

Prior to our homeowners' meeting, the candidates forum, which was well attended, gave the audience a chance to meet the four people who are running for State Representative District 90 a chance to meet them and to learn some interesting facts about them. The audience asked questions which were quickly answered by all four. This was an opportunity to help people decide for whom they will vote on Nov. 6th. Early voting starts Tuesday, Oct. 23 through Oct. 30.

Sadly, our own homeowners' meeting was not well attended; however, the sheriff's office presented its program on speeding, crime, drugs, and a special delivery on the recent shooting. The fourth person involved in that recent high-speed chase, shooting, and apprehension of criminals was found at 206 Eden Isles Blvd. A special request was made to the sheriff's office to place a car on the boulevard on Halloween to manage the congestion by cars, children, those residents coming home from work, a very dangerous situation.

The fire department presented an interesting program. Brian Macaluso discussed fire alarms, different kinds, how to tell when they are working efficiently, and when to suspect a problem. He offered to have someone come out to your home to install or change fire alarms if you need help. He gave out bottles with markings on them to be kept in your refrigerator. These bottles should contain important information concerning health, medicines, doctors, hospitals, and living will. EMT's and fire personnel are trained to look for this should the situation arise.

The business of Moonraker Island Civic Organization was handled without a problem. The minutes of the last meeting and the reconciliation of the account was placed on the tables, as usual, and those were accepted and seconded by those who attended. Thanks went out to Stephen Deep and Jack Seregney. There was a report on the progress of the bridge, its delays and the reason for those delays; attendees were encouraged to attend the levee board meeting, Oct.17 at the Towers Bldg., 6:00P.M. ; a personal report was given on the Wildlife and Fisheries Dept. and how efficient/inefficient it is; the camera situation is in the works. We are working with the parish to solve the issue of placement.

Some projections for the future were announced:

There is the possibility of being able to install covenants in 2020. We are looking for residents to think about the benefits and drawbacks of such and a committee to engage this project. This will be done after the new year.

MICO needs some volunteers to help collect dues after the January meeting.

The residents should be considering raising the dues in January.

Please be aware that the board is aware that nothing will be done without residents' approval.

THESE TOPICS WILL BE DISCUSSED AT THE JANUARY MEETING. PLEASE ATTEND.

An interesting point is that the political forum began at 6:00 P.M.; our meeting followed at 7:00 P.M. and everything ended at 8:05P.M. That's pretty efficient.

Bonnie
